

User Stories

Header and Navigation

- As a **visitor**, I see a fixed navigation bar so that I can easily move between sections of the portfolio without scrolling back to the top.
 - As a **user**, I see the navigation to highlight the active section as I scroll, so I know where I am on the page.
 - As a **potential client**, I want the navigation links to be responsive and accessible on all devices.
-

About Section

- As a **visitor**, I see a concise summary of the developer's skills and expertise, so I can quickly understand their value proposition.
 - As a **user**, I see a placeholder image or professional picture that aligns with the introduction, so the page feels personal and visually engaging.
-

Skills Section

- As a **hiring manager**, I see a visual representation of the developer's skills (e.g., icons or badges) so that I can evaluate their technical expertise at a glance.
 - As a **user**, I want the skills to include animations or hover effects, so the section feels interactive and modern.
 - As a **developer**, I see list skills in a clear hierarchy (basic, intermediate, advanced), so potential clients know my level of proficiency.
-

Projects Section

- As a **potential client**, I see each project to have a title, description, and a link to more details, so I can assess the relevance of the developer's work.
 - As a **visitor**, I see the project cards to be visually uniform and responsive, so they look good on all devices.
 - As a **user**, I see a "View Project" button for each card, so I can learn more about the developer's work.
-

Client Feedback Section

- As a **potential client**, I see testimonials from previous clients to build trust in the developer's skills and reliability.

- As a **visitor**, I see the testimonials to be displayed in an interactive carousel, so I can navigate between them smoothly.
 - As a **user**, I see the feedback cards to display the client's name, email, and their testimonial for credibility.
-

Contact Section

- As a **visitor**, I see a simple and functional contact form, so I can send messages to the developer easily.
 - As a **user**, I see the form to include validation (e.g., email format), so I don't accidentally submit incorrect information.
 - As a **potential client**, I see a map or visual location marker, so I can understand where the developer is based.
 - As a **visitor**, I see clear submission feedback (e.g., "Message sent"), so I know the form worked.
-

General Design and Usability

- As a **visitor**, I see the entire page to be mobile-friendly and responsive, so it looks good on any device.
- As a **user**, I want smooth scrolling and animations between sections, so the experience feels modern and engaging.
- As a **potential client**, I see clear and readable typography, so I can focus on the content without distractions.
